1 Introduction

1.1 Introduction

Serial number:

PIN code:

The serial number is on the product rating plate and on the product carton.

- Use the serial number to register your product on www.husqvarna.com.

1.1.1 Support

For support about the product, speak to your Husqvarna servicing dealer.

1.1.2 Product description

Note: Husqvarna regularly updates the appearance and function of the products. Refer to *Support on page 3*.

The product is a robotic lawn mower. The product has a battery power source and cuts the grass automatically. It continuously alternates between mowing and charging. The movement pattern is random, which means that the lawn is mowed evenly and with less wear. The boundary wire and the guide wire controls the movement of the product within the work area. Sensors in the product senses when it is approaching the boundary wire. The front of the product always passes the boundary wire by a specific distance before the product turns around. When the product hits an obstacle or approaches the boundary wire the product selects a new direction.

The operator selects the operation settings with the keys on the keypad. The display shows the selected and possible operation settings, and the operation mode of the product.

1.1.2.1 Mowing technique

The product is emission free, easy to use and saves energy. The frequent cutting technique improves the grass quality and decreases the use of fertilizers. Collection of grass is not necessary.

1.1.2.2 Find the charging station

The product operates until the battery state of charge is low. Then it follows the guide wire to the charging station. The guide wire is laid from the charging station towards, for instance, a remote part of the work area or through a narrow passage. The guide wire is connected with the boundary wire and makes it much easier and faster for the product to find the charging station.

1.1.2.3 Automower® Connect

Automower® Connect is a mobile application that makes it possible to select the operation settings remotely. Refer to *Automower® Connect app on page 29*.

1.3 Symbols on the product

These symbols can be found on the product. Study them carefully.

WARNING: Read the user instructions before operating the product.

WARNING: Disable the product before working on or lifting the product.

WARNING: Keep a safe distance from the product when operating. Keep your hands and feet away from the rotating blades.

WARNING: Do not ride on the product. Do not put your hands or feet close to or under the product.

Lock function.

Use a detachable power supply as defined on the rating label next to the symbol.

This product conforms to the applicable EC Directives.

It is not permitted to dispose this product as normal household waste. Ensure that the product is recycled in accordance with local legal requirements.

The chassis contains components which are sensitive to electrostatic discharge (ESD). The chassis must also be resealed in a professional manner. For these reasons the chassis shall only be opened by authorized service technicians. A broken seal can result in the entire or parts of the guarantee no longer being valid.

The low-voltage cable must not be shortened, extended or spliced.

Do not use a trimmer nearby the low-voltage cable. Be careful when trimming edges where the cables are placed.

1.4 Symbols on the display

In the schedule menu you can set when the product will cut the lawn.

In the cutting height menu you can set the cutting height of the product.

In the security menu you can select between 3 security levels for the product.

In the messages menu you can find the *Fault messages* and *Info messages* of the product.

The weather timer function automatically adapts the cutting intervals to the grass growth.

In the installation menu you can set manual settings for the installation of the product.

In the settings menu you can set the general settings of the product.

In the accessories menu you can set the settings for the accessories of the product.

The schedule is set for the product to not cut the grass.

The product overrides the schedule.

The battery indicator shows the charge level of the battery. When the product charges the symbol flashes.

The product is put in the charging station but do not charge the battery.

The product is set in ECO-mode.

Bluetooth® wireless communication with Automower® Connect on your mobile device.

1.5 Symbols on the battery

Read the user instructions.

Do not discard the battery into fire and do not expose the battery to a heat source.

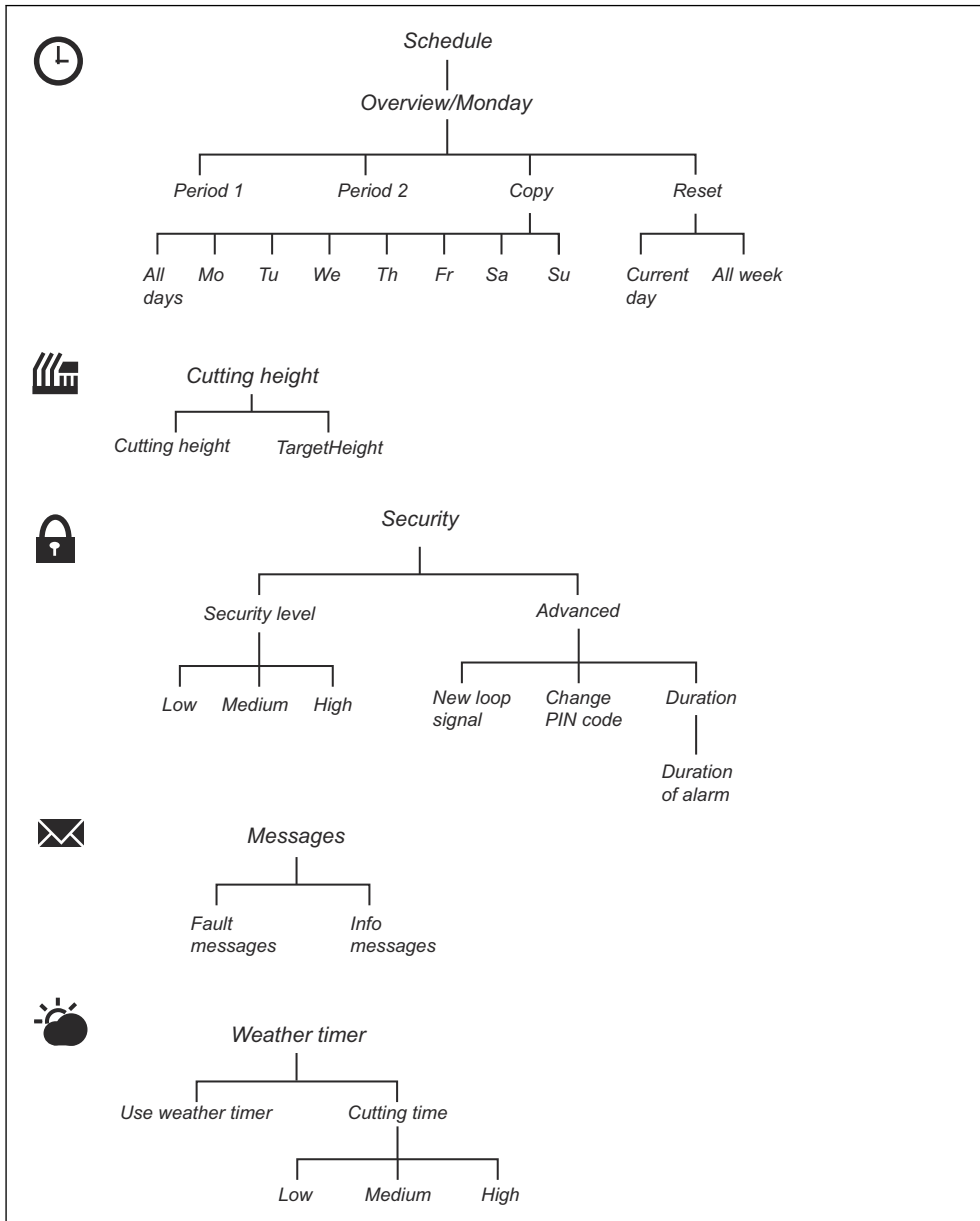

Do not immerse the battery into water.

1.6 General manual instructions

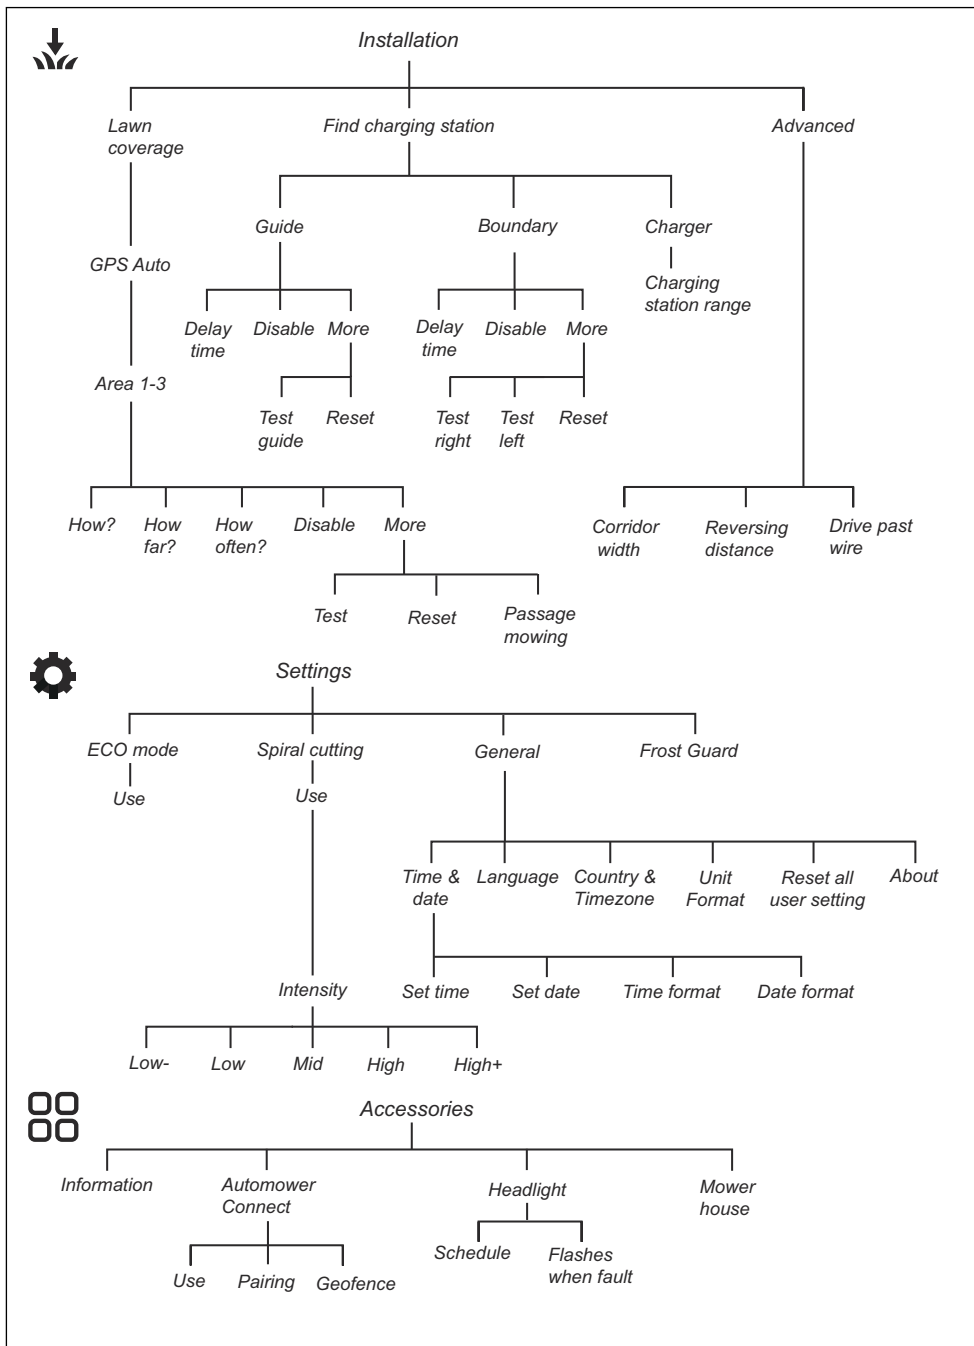

The following system is used in the Operator's Manual to make it easier to use:

- Text written in *italics* is a text that is shown in the display or is a reference to another section in the Operator's Manual.
- Text written in **bold** is one of the buttons on the product.

1.7 Menu structure overview - 1

1.8 Menu structure overview - 2

1.9 Display

The display on the product shows information and settings of the product.

To access the display, push the **STOP** button.

1.10 Keypad

Use the keypad on the product to navigate in the menu.

To access the keypad, push the **STOP** button.

- Use the **ON/OFF** button (A) to switch on and switch off the product. The indicator lamp on the keypad is an important status indicator. Refer to *To use the ON/OFF button on page 31*.
- Use the **START** button (B) to start the operation of the product.
- Use the **BACK** button (C) to move up in the menu lists.
- Use the **arrow** buttons (D) to navigate in the menu.
- Use the **OK** button (E) to confirm the settings you select in the menus.
- Use the **MENU** button (F) to go to the main menu.
- Use the **PARK** button (G) to send the product to the charging station.
- Use the **number** buttons (H) to enter PIN code, time and date.

2 Safety

2.1 Safety information

2.1.1 IMPORTANT. READ CAREFULLY BEFORE USE. KEEP FOR FUTURE REFERENCE

The operator is responsible for accidents or hazards occurring to other people or property.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities (that could affect a safe handling of the product), or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Local regulations may restrict the age of the operator. Cleaning and maintenance shall not be made by children without supervision.

Never connect the power supply to an outlet if the plug or cord is damaged. Worn or damaged cord increase the risk of electric shock.

Only charge the battery in the included charging station. Incorrect use may result in electric shock, overheating or leaking of corrosive liquid from the battery. In the event of leakage of electrolyte, flush with water/neutralizing agent. Seek medical help if it comes in contact with the eyes.

Use only original batteries recommended by the manufacturer. Product safety cannot be guaranteed with other than original batteries. Do not use non-rechargeable batteries.

The appliance must be disconnected from the supply mains when removing the battery.

WARNING: The product can be dangerous if used incorrectly.

CAUTION: Used if there is a risk of damage to the product, other materials or the adjacent area if the instructions in the manual are not obeyed.

WARNING: Do not use the product when persons, especially children, or animals are in the work area.

WARNING: Keep your hands and feet away from the rotating blades. Never put your hands or feet close to or under the product when it is switched on.

WARNING: In the event of an injury or accident seek medical help.

2.2 Safety definitions

Warnings, cautions and notes are used to point out specially important parts of the manual.

WARNING: Used if there is a risk of injury or death for the operator or bystanders if the instructions in the manual are not obeyed.

Note: Used to give more information that is necessary in a given situation.

2.3 Safety instructions for operation

2.3.1 Use

- The product may only be used with the equipment recommended by the manufacturer. All other types of use are incorrect. The manufacturer's instructions with regard to operation/maintenance must be followed precisely.
- Warning signs shall be placed around the work area of the product if it is used in public areas. The signs shall have the following text: **Warning! Automatic lawnmower! Keep away from the machine! Supervise children!**

- Use the park mode, refer to *Operating modes - Park on page 32* or switch off the product when persons, especially children, or animals are in the work area. It is recommended to program the product for use during hours when the area is free from activity. Refer to *Schedule on page 22*. Consider that certain animals, e.g. hedgehogs, are active at night. They can potentially be harmed by the product.
- Do not install the charging station, including any accessory, at a location that is below, or within 60 cm / 24 in. from, any combustible material. Do not install the power supply unit in easily flammable surroundings. In case of malfunction, heating of

the charging station and the power supply may occur and create a potential risk of fire.

- The product may only be operated, maintained and repaired by persons that are fully conversant with its special characteristics and safety regulations. Please read the Operator's Manual carefully and make sure you understand the instructions before using the product.
- It is not permitted to modify the original design of the product. All modifications are made at your own risk.
- Check that there are no foreign objects such as stones, branches, tools or toys on the lawn. If the blades hit foreign objects the blades can be damaged. Always switch off the product with the **ON/OFF** button before clearing a blockage. Inspect the product for damage before starting the product again.

- If the product starts to vibrate abnormally. Always switch off the product with the **ON/OFF** button and inspect for damage before starting the product again.
- Start the product according to the instructions. When the product is switched on, make sure to keep your hands and feet away from the rotating blades. Never put your hands and feet under the product.
- Never touch moving hazardous parts, such as the blade disc, before it has come to a complete stop.
- Never lift up the product or carry it around when it is switched on.
- Do not let persons who do not know how the product works and behaves use it.
- The product must never be allowed to collide with persons or other living creatures. If a person or other living creature comes in the product's way it shall be stopped immediately. Refer to *To stop the product on page 32*.
- Do not put anything on top of the product or its charging station.
- Do not allow the product to be used with a defective guard, blade disc or body. Neither should it be used with defective blades, screws, nuts or cables. Never connect a damaged cable, or touch

a damaged cable before it is disconnected from the supply.

- Do not use the product if the **ON/OFF** button and **STOP** button does not work.
- Always switch off the product using the **ON/OFF** button when the product is not in use. The product can only start when the product has been switched on with the **ON/OFF** button and the correct PIN code has been entered.
- Husqvarna does not guarantee full compatibility between the product and other types of wireless systems such as remote controls, radio transmitters, hearing loops, underground electric animal fencing or similar.
- Metal objects in the ground (for example reinforced concrete or anti-mole nets) can result in a stoppage. The metal objects can cause interference with the loop signal which then can lead to a stoppage.
- Operation and storage temperature range is 0-50 °C / 32-122 °F. Temperature range for charging is 0-45 °C / 32-113 °F. Too high temperatures might cause damage to the product.

2.3.2 Battery safety

WARNING: Lithium-ion batteries can explode or cause fire if disassembled, short-circuited, exposed to water, fire, or high temperatures. Handle carefully, do not dismantle, open the battery or use any type of electrical/mechanical abuse. Avoid storage in direct sunlight.

For more information about the battery, refer to *Battery on page 35*

2.3.3 How to lift and move the product

WARNING: The product must be switched off before lifting it. The product is disabled when the indicator lamp on the keypad is not lit.

CAUTION: Do not lift the product when it is parked in the charging station. It can damage the charging station and/or the product. Push **STOP** and pull the product out of the charging station before lifting it.

To safely move from or within the work area:

1. Push the **STOP** button to stop the product.

2. Push the **ON/OFF** button for 3 seconds and make sure the product is switched off. Check that the indicator lamp on the keypad is not lit. This means that the product is disabled. Refer to *To use the ON/OFF button on page 31*.

3. Carry the product by the handle with the blade disc away from the body.

2.3.4 Maintenance

WARNING: The product must be switched off before any maintenance is done. Use the plug to disconnect the charging station before any cleaning or maintenance of the charging station or the loop wire.

WARNING: Use the plug to disconnect the charging station before any cleaning or maintenance of the charging station or the loop wire.

CAUTION: Never use a high-pressure washer or even running water to clean the product. Never use solvents for cleaning.

Inspect the product weekly and replace any damaged or worn parts. Refer to *Maintenance on page 33*.

2.3.5 In the event of a thunderstorm

To reduce the risk of damage to electrical components in the product and the charging station, we recommend that all connections to the charging station are disconnected (power supply, boundary wire and guide wire) if there is a risk of a thunderstorm.

1. Mark the wires to simplify reconnecting. The charging station's connections are marked AR, AL and GUIDE.
2. Disconnect all connected wires and the power supply.
3. Connect all the wires and the power supply if there is no longer a risk of thunder. It is important that each wire is connected to the right place.

3 Installation

3.1 Introduction - Installation

WARNING: Read and understand the safety chapter before you install the product.

CAUTION: Use original spare parts and installation material.

Note: Refer to www.husqvarna.com for more information about installation.

3.2 Main components for installation

The installation involves the following components:

- A robotic lawn mower that mows the lawn automatically.
- A charging station, which has 3 functions:
 - To send control signals along the boundary wire.
 - To send control signals along the guide wire so that the product can follow the guide to specific remote areas in the garden and can find its way back to the charging station.
 - To charge the product.
- A power supply, which is connected to the charging station and a 100-240V power outlet.
- Loop wire, which is laid around the work area and around objects and plants that the product must not run into. The loop wire is used both as boundary wire and guide wire.

3.3 General preparations

CAUTION: Holes with water in the lawn can cause damage to the product.

Note: Read through the Installation chapter before beginning the installation. How the installation is done affects how the product performs. It is therefore important to plan the installation carefully.

- Make a blueprint of the work area and include all obstacles. This makes it easier to see the ideal positions for the charging station, the boundary wire and the guide wire.
- Make a mark on the blueprint where to put the charging station, the boundary wire and the guide wire.

- Make a mark on the blueprint where the guide wire connects to the boundary wire. Refer to *To install the guide wire on page 20*.
- Fill in holes in the lawn.
- Cut the grass before you install the product. Make sure that the grass is maximum 10 cm / 3.9 in.

Note: The first weeks after installation the perceived sound level when cutting the grass may be higher than expected. When the product has cut the grass for some time, the perceived sound level is much lower.

3.4 Before the installation of the wires

You can select to attach the wires with stakes or bury them. You can use the 2 procedures for the same work area.

CAUTION: If you use a dethatcher in the work area, bury the boundary wire and the guide wire to prevent them from damage.

3.4.1 To examine where to put the charging station

- Keep a minimum 3 m / 10 ft. of free space in front of the charging station. Refer to *To examine where to put the guide wire on page 18*.
- Keep a minimum of 150 cm / 60 in. of free space to the right and left of the center of the charging station.
- Put the charging station near a power outlet.
- Put the charging station on a level surface.
- The baseplate of the charging station must not be bent.

- If the work area has two parts separated with a steep slope, we recommend to put the charging station in the lower section.

- Put the charging station in an area with protection from the sun.
- If the charging station is installed on an island, make sure to connect the guide wire to the island. Refer to *To make an island on page 17*.

3.4.2 To examine where to put the power supply

WARNING: Do not cut or extend the low-voltage cable. There is a risk of electrical shock.

CAUTION: Make sure that the blades on the product do not cut the low-voltage cable.

WARNING: The power supply cable and extension cable must be outside the work area to avoid damage to the cables.

CAUTION: Do not put the low-voltage cable in a coil or below the charging station plate. The coil causes interference with the signal from the charging station.

- Put the power supply in an area with a roof and protection from the sun and rain.
- Put the power supply in an area with good airflow.
- Use a residual-current device (RCD) with a tripping current of maximum 30 mA when you connect the power supply to the power outlet.

Low-voltage cables of different lengths are available as accessories.

3.4.3 To examine where to put the boundary wire

CAUTION: There must be a barrier of minimum 15 cm / 6 in. in height between the boundary wire and water bodies, slopes, precipices or public roads. This will prevent damage to the product.

CAUTION: Do not let the product operate on gravel.

CAUTION: Do not make sharp bends when you install the boundary wire.

CAUTION: For careful operation without noise, isolate all obstacles such as trees, roots and stones.

The boundary wire should be put as a loop around the work area. Sensors in the product senses when the product approaches the boundary wire, and the product selects another direction. All parts of the work area must be maximum 35 m / 115 ft. from the boundary wire.

To make the connection easier between the guide wire and the boundary wire, it is recommended to make an eyelet where the guide wire will be connected. Make the eyelet with approximately 20 cm / 8 in. of the boundary wire.

Note: Make a blueprint of the work area before you install the boundary wire and guide wire.

- Put the boundary wire around all of the work area (A). Adapt the distance between the boundary wire and obstacles.
- Put the boundary wire 35 cm / 14 in. (B) from an obstacle that is more than 5 cm / 2 in. high.

- Put the boundary wire 30 cm / 12 in. (C) from an obstacle that is 1-5 cm / 0.4-2 in. high.

- Put the boundary wire 10 cm / 4 in. (D) from an obstacle that is less than 1 cm / 0.4 in. high.

- If you have a paving stone path that is in level with the lawn, put the boundary wire below the paving stone.

Note: If the paving stone is minimum 30 cm / 12 in. wide, use the factory setting for the *Drive Past Wire* function to cut all the grass adjacent to the paving stone. Refer to *To set the Drive Past Wire function* on page 28.

- If you make an island, put the boundary wire that runs to and from the island near together (E). Put the wires in the same stake. Refer to *To make an island* on page 17.
- Make an eyelet (F) where the guide wire is to be connected to the boundary wire.

3.4.3.1 To put the boundary wire in a slope

The product can operate in 40% slopes. Slopes that are too steep must be isolated with the boundary wire. The gradient (%) is calculated as height per m. Example: 10 cm / 100 cm = 10%.

- For slopes steeper than 40% inside the work area, isolate the slope with boundary wire.
- For slopes steeper than 15% along the outer edge of the lawn, put the boundary wire 20 cm / 8 in. (A) from the edge.

- For slopes adjacent to a public road, put a barrier of minimum 15 cm / 6 in. along the outer edge of the slope. You can use a wall or a fence as a barrier.

3.4.3.2 Passages

A passage is a section that has boundary wire on each side and that connects 2 parts of the work area. The distance between the boundary wire on each side in the passage must be a minimum of 60 cm / 24 in.

Note: If a passage is less than 2 m / 6.5 ft. wide, install a guide wire through the passage.

The recommended minimum distance between the guide wire and the boundary wire is 30 cm / 12 in. The product always runs to the left of the guide wire as seen facing the charging station. It is recommended to have as much free area as possible to the left of the guide wire (A).

3.4.3.3 To make an island

CAUTION: Do not put a section of boundary wire across the other. The sections of boundary wire must be parallel.

CAUTION: Do not put the guide wire across the boundary wire.

CAUTION: Isolate or remove obstacles that are less than 15 cm / 6 in. in height. Isolate or remove obstacles that slope slightly, for example, stones, trees or roots. This will prevent damage to the blades of the product.

To make an island, isolate areas in the work area with the boundary wire. We recommend to isolate all stable objects in the work area.

Some obstacles are resistant to a collision, for example, trees or bushes that are more than 15 cm / 6 in. in height. The product will collide with the obstacle and then select a new direction.

- Put the boundary wire to and around the obstacle to make an island.
- Put the 2 sections of boundary wire to and from the island close together. This will make the product run across the wire.
- Put the 2 sections of boundary wire in the same stake.

3.4.3.4 To make a secondary area

Make a secondary area (B) if the work area has 2 areas that are not connected with a passage. The work area with the charging station is the main area (A).

Note: The product must be manually moved between the main area and the secondary area.

- Put the boundary wire around the secondary area (B) to make an island. Refer to *To make an island* on page 17.

Note: The boundary wire must be put as 1 loop around all of the work area (A + B).

Note: When the product cuts grass in the secondary area, the *Secondary area* mode must be selected. Refer to *Secondary area* on page 31.

3.4.4 To examine where to put the guide wire

- Put the guide wire in a line at a minimum of 2 m / 6.5 ft. in front of the charging station.
- Make as much free area as possible to the left of the guide wire when facing the charging station.
- Put the guide wire minimum 30 cm / 12 in. from the boundary wire.
- Do not make sharp bends when you install the guide wire.

- If the work area has a slope, put the guide wire diagonally across the slope.

3.4.5 Work area examples

- If the charging station is put in a small area (A), make sure that the distance to the boundary wire is at a minimum 3 m / 10 ft. in front of the charging station.
- If the work area has a passage (B) with no guide wire installed, the minimum distance between the boundary wires is 2 m / 6.5 ft. With a guide wire installed through the passage, the minimum distance between the boundary wires is 60 cm / 24 in.
- If the work area has areas which are connected by a narrow passage (B), you can set the product to first follow and then leave the guide wire after a certain distance (C). The settings can be changed in *GPS Assisted Navigation, Lawn Coverage and Systematic Passage Mowing* on page 25.
- If the work area includes a secondary area (D), refer to *Secondary area* on page 31. Put the product in the secondary area and select *Secondary area mode*.

WARNING: Do not encapsulate the power supply. Condensed water can harm the power supply and increase the risk of electrical shock.

WARNING: Risk of Electric Shock. Install only to an residual-current device (RCD) with a tripping current of maximum 30 mA when connecting the power supply to the wall socket. Applicable to USA/Canada. If power supply is installed outdoors: Risk of Electric Shock. Install only to a covered Class A GFCI receptacle (residual-current device) that has an enclosure that is weatherproof with the attachment plug cap inserted or removed.

CAUTION: Do not make new holes in the charging station plate.

CAUTION: Do not put your feet on the baseplate of the charging station.

WARNING: The power supply cable and the extension cable must be outside the work area to avoid damage to the cables.

3.5 Installation of the product

3.5.1 Installation tools

- Hammer/plastic mallet: To simplify putting the stakes into the ground.
- Edge cutter/straight spade: To bury the boundary wire.
- Combination pliers: For cutting the boundary wire and pressing the connectors together.
- Adjustable plier: For pressing the couplers together.

3.5.2 To install the charging station

WARNING: Obey national regulations about electrical safety.

WARNING: The product is only to be used with the power supply unit supplied by Husqvarna.

WARNING: Do not put the power supply at a height where there is a risk it can be put in water. Do not put the power supply on the ground.

When connecting the power supply, only use a wall socket that is connected to an residual-current device.

1. Read and understand the instructions about the charging station. Refer to *To examine where to put the charging station on page 14*.
2. Put the charging station in the selected area.

Note: Do not attach the charging station to the ground with the screws until the guide wire is installed. Refer to *To install the guide wire on page 20*.

3. Connect the low-voltage cable to the charging station.
4. Put the power supply at a minimum height of 30 cm / 12 in.

5. Connect the power supply cable to a 100-240V power outlet.

Note: When the charging station is connected, it is possible to charge the product. Place the product in the charging station while the boundary and guide wires are being laid. Switch on the product. Do not continue with any product settings before the installation is complete.

6. Put the low-voltage cable in the ground with stakes or bury the cable. Refer to *To put the wire into position with stakes on page 21* or *To bury the boundary wire or the guide wire on page 21*.
7. Connect the wires to the charging station after the installation of boundary wire and guide wire is complete. Refer to *To install the boundary wire on page 20* and *To install the guide wire on page 20*.
8. Attach the charging station to the ground with the supplied screws after the guide wire is installed. Refer to *To install the guide wire on page 20*.

3.5.3 To install the boundary wire

CAUTION: Do not put remaining wire in a coil. The coil causes interference with the product.

1. Put the boundary wire around all of the work area. Start and complete the installation behind the charging station.
2. Open the connector and put the boundary wire in the connector.

3. Close the connector with a pair of pliers.

4. Cut the boundary wire 1-2 cm / 0.4-0.8 in. above each connector.
5. Push the right connector onto the metal pin on the charging station with the mark "AR".
6. Push the left connector onto the metal pin on the charging station with the mark "AL".

3.5.4 To install the guide wire

CAUTION: Twinned cables, or a screw terminal block that is insulated with insulation tape are not satisfactory splices. Soil moisture will cause the wire to oxidize and after a time result in a broken circuit.

1. Open the connector and put the wire in the connector.
2. Close the connector with a pair of pliers.
3. Cut the guide wire 1-2 cm / 0.4-0.8 in. above each connector.
4. Push the guide wire through the slot in the charging station plate.
5. Push the connector onto the metal pin on the charging station with the mark "GUIDE".
6. Disconnect the charging station from the power outlet.
7. Put the end of the guide wire at the eyelet on the boundary wire.
8. Cut the boundary wire with a pair of wire cutters.
9. Connect the guide wire to the boundary wire with a coupler.

- a) Put the 2 ends of the boundary wire and the end of the guide wire into the coupler.

Note: Make sure that you can see the ends of the wires through the transparent area of the coupler.

- b) Push down the cover on the coupler with adjustable pliers to attach the wires in the coupler.

10. Attach the guide wire to the ground with stakes or bury the guide wire in the ground. Refer to *To put the wire into position with stakes on page 21* or *To bury the boundary wire or the guide wire on page 21*.
11. Connect the charging station to the power outlet.

3.6 To put the wire into position with stakes

CAUTION: Make sure that the stakes hold the boundary wire and the guide wire against the ground.

CAUTION: Cutting the grass too low right after installation can damage the wire insulation. Damage to the insulation may not cause disruptions until several weeks or months later.

1. Put the boundary wire and the guide wire on the ground.
2. Put the stakes at a maximum of 75 cm / 30 in. distance from each other.
3. Attach the stakes to the ground with a hammer or a plastic mallet.

Note: The wire is overgrown with grass and not visible after a few weeks.

3.7 To bury the boundary wire or the guide wire

- Cut a groove in the ground with an edge cutter or a straight shovel.
- Put the boundary wire or the guide wire 1-20 cm / 0.4-8 in. into the ground.

3.8 To extend the boundary wire or the guide wire

Note: Extend the boundary wire or the guide wire if it is too short for the work area. Use original spare parts, for example couplers.

1. Disconnect the charging station from the power outlet.
2. Cut the boundary wire or the guide wire with a pair of wire cutters where it is necessary to install the extension.
3. Add wire where it is necessary to install the extension.
4. Put the boundary wire or the guide wire into position.
5. Put the wire ends into a coupler.

Note: Make sure that you can see the ends of the boundary wire or the guide wire through the transparent area of the coupler.

6. Push down the cover on the coupler with adjustable pliers to attach the wires in the coupler.

7. Put the boundary wire or the guide wire into position with stakes.
8. Connect the charging station to the power outlet.

3.9 After the installation of the product

3.9.1 To do a visual check of the charging station

1. Make sure that the indicator LED lamp on the charging station has a green light.

2. If the indicator LED lamp does not have a green light, do a check of the installation. Refer to *Indicator lamp in the charging station on page 41* and *To install the charging station on page 19*.

3.9.2 To do the basic settings

Before the product starts to operate for the first time, you must do the basic settings.

1. Put the product in the charging station.
2. Switch on the product.
3. Push the **arrow** buttons and the **OK** button. Select language, country, date, time and set a PIN code.

Note: It is not possible to use 0000 as PIN code.

3.10 To do the product settings

Use the control panel to set all settings for the product. The control panel has a display and a keypad, you can access all functions through the menus. The functions have factory settings that is applicable for almost all work areas, but the settings can be adapted to the conditions for each work area.

3.10.1 Menu structure

The main menu contains:

- *Schedule*
- *Cutting height*
- *Security*
- *Messages*
- *Weather timer*
- *Installation*
- *Settings*
- *Accessories*

Refer to *Menu structure overview - 1 on page 7* and *Menu structure overview - 2 on page 8*.

3.10.2 To get access to the menu

1. Push the **STOP** button.
2. Use the **number** buttons and the **OK** button to enter the PIN code.
3. Push the **MENU** button.

3.10.3 Schedule

Note: The lawn should not be cut too often to obtain the best result. If the product is allowed to operate too much, the lawn may appear flattened. The product is also subjected to unnecessary wear.

3.10.3.1 To set the schedule

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Schedule > Overview*.
3. Use the **arrow** buttons and the **OK** button to select the day.
4. Use the right **arrow** button to select the period.
5. Push the **OK** button.
6. Calculate the suitable operating hours. Refer to *Make an estimate of the necessary operating time on page 22*.
7. Enter the time with the **number** buttons. The product can cut the grass 1 or 2 periods each day.

MONDAY	
<input checked="" type="checkbox"/>	00:00 - 15:00
<input type="checkbox"/>	--:-- --:--
Copy	Reset

8. If the product must not cut grass on a specified day, unselect the box adjacent to the 2 time periods.

3.10.3.2 Make an estimate of the necessary operating time

If the work area is less than maximum product capacity, the schedule must be set to decrease the wear on the lawn and the product. The product has a maximum cutting time each day. You can set the operating time of the product in the schedule. The operating time includes cutting, searching and charging. The operating time can be different because of many reasons, for example the layout of the work area, the grass growth and age of the battery. When the product has operated to the maximum cutting time in a day, the message *Today's mowing complete* is shown in the display of the product.

The recommended operating times for some work area examples are shown in the table below. If the result is not satisfactory, increase the operating time.

Area, m ²	Recommended operating time, h
500	10
1000	17
1500	24

3.10.3.3 To copy the schedule setting

- Do steps 1–3 in *To get access to the menu on page 22*.
- Use the **arrow** buttons and the **OK** button to move through the menu structure *Schedule > Overview > Copy*.
- Use the **arrow** buttons and the **OK** button to copy the schedule setting. You can copy the schedule settings day to day or for the full week.

3.10.3.4 To reset the schedule setting

You can remove all schedule settings and use the factory setting.

- Do steps 1–3 in *To get access to the menu on page 22*.
- Use the **arrow** buttons and the **OK** button to move through the menu structure *Schedule > Overview > Reset*.
 - Push the **arrow** buttons to select *Current day* to only reset the current day to factory settings.
 - Push the **arrow** buttons to select *All week* to reset all schedule settings to factory settings.
- Push the **OK** button.

3.10.4 Cutting height

3.10.4.1 Adjust the cutting height

CAUTION: During the first weeks after a new installation, the cutting height must be set to MAX to avoid damaging the loop wire. After this, the cutting height can be lowered step by step every week until the desired cutting height has been reached.

The cutting height can be varied from MIN (2 cm / 0.8 in.) to MAX (5 cm / 2 in.).

To set the cutting height

- Do steps 1–3 in *To get access to the menu on page 22*.
- Use the **arrow** buttons and the **OK** button to move through the menu structure *Cutting height > Cutting height*.
- Use the **arrow** buttons to set the cutting height.
- Push the **OK** button.

3.10.4.2 TargetHeight

Use the TargetHeight function to lower the cutting height from MAX to the specified cutting height gradually during 10 days. If you change the cutting height manually during this time it will disable the TargetHeight function.

To set the TargetHeight

- Do steps 1–3 in *To get access to the menu on page 22*.
- Use the arrow buttons and the **OK** button to move through the menu structure *Cutting height > TargetHeight*.
- Push the **OK** button to enable or disable the function.
- Push the **BACK** button.

3.10.5 Security level

There are 3 security levels for the product.

Function	Low	Medium	High
<i>PIN code</i>		X	X
<i>STOP button pressed</i>			X
<i>Carried away</i>			X

- PIN-code* - The correct PIN-code must be entered to get access to the menu structure of the product. If the incorrect PIN-code is entered 5 times, the product is locked for a time. The lock is extended for each new incorrect try.
- STOP button pressed* - The alarm goes off if the **STOP** button has been pushed and the PIN code is not entered in less than 30 seconds.
- Carried away* - The alarm goes off if the product is lifted.

3.10.5.1 To set the security level

Select 1 of 3 security levels for your product.

- Do steps 1–3 in *To get access to the menu on page 22*.

2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Settings > Security > Security level*.
3. Use the **arrow buttons** and the **OK** button to select the level of security.
4. Push the **OK** button.

3.10.5.2 To create a New loop signal

The loop signal is randomly selected to create a unique link between the product and the charging station. In rare cases, there may be a need to generate a new signal, for instance if two adjacent installations have a very similar signal.

1. Place the product in the charging station.
2. Do steps 1–3 in *To get access to the menu on page 22*.
3. Use the **arrow buttons** and the **OK** button to move through the menu structure *Security > Advanced > New loop signal*.
4. Await confirmation that the loop signal has been generated. This normally takes about 10 seconds.

3.10.5.3 To change the PIN-code

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Settings > Security > Advanced > Change PIN-code*.
3. Enter the new PIN code.
4. Push the **OK** button.
5. Enter the new PIN code again.
6. Push the **OK** button.
7. Make a note of the new PIN code. Refer to *Introduction on page 3*.

3.10.5.4 To change the duration of the alarm

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Security > Advanced > Duration > Duration of alarm*.
3. Use the **arrow buttons** to select a time interval of 1 to 20 minutes.
4. Push the **BACK** button.

3.10.6 Messages

In this menu the previous fault and information messages can be found. For some of the messages, there are tips and advice to help to rectify the fault. Refer to *Troubleshooting on page 36*.

If the product is disrupted in any way, for example it is trapped or the battery is low, a message is saved relating to the disruption and the time it happened.

If the same message is repeated several times, this may indicate that an adjustment to the installation or the product is required. Refer to *Installation on page 14*.

3.10.6.1 To read the messages

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Messages > Fault messages* and *Messages > Info messages*.
3. Read the messages and read the *Troubleshooting* to get information and recommendations to correct the faults.

3.10.7 Weather timer

Weather timer automatically adjust the cutting time to the growth of the grass. The product is not permitted to operate more than the schedule settings.

Note: When using *Weather timer*, it is recommended to make as much operating time as possible available for *Weather timer*. Do not restrict the schedule more than necessary.

The first operation of the day is set by the schedule settings. The product always complete 1 mowing cycle, and then *Weather timer* selects if the product will continue to operate or not.

Note: *Weather timer* is reset if the product does not operate for more than 50 hours, or if a *Reset of all user settings* is done. *Weather timer* is not changed if a *Reset of schedule settings* is done.

3.10.7.1 To set the Weather timer

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Weather timer > Use Weather timer*.
3. Push the **OK** button to select the *Weather timer*.
4. Push the **BACK** button.

3.10.7.2 To set the Weather timer frequency

Set how frequently the product cuts the grass when the *Weather timer* is in use. There are 3 frequency levels: *Low*, *Mid* and *High*. The higher the frequency, the more sensitive the product is to the grass growth. That is, if

the grass growth is high then the product is allowed to work longer.

Note: If the mowing results are not optimal when using *Weather timer*, the schedule settings may need adjusting. Do not restrict the schedule more than necessary. Also, check that the blade disc is clean and that the blades are in good condition.

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Weather timer > Cutting time*.
3. Use the **arrow** buttons to select *Low, Mid or High* frequency.
4. Push the **BACK** button.

3.10.8 Installation

In the Installation menu it is possible to adapt the settings of the product for best mowing result.

3.10.8.1 GPS Assisted Navigation, Lawn Coverage and Systematic Passage Mowing

The *GPS Assisted Navigation* function helps the product to select the most optimal operation. Use the *Lawn coverage* function to do manual settings or to use the function *Systematic Passage Mowing*.

If the work area includes remote parts that are connected with narrow passages, the *Lawn Coverage* and *Systematic Passage Mowing* function are useful to be able to maintain a well-cut lawn in all parts of the yard. The *Lawn Coverage* function is used to guide the product to remote parts of the work area. The *Systematic Passage Mowing* function is used for narrow passage mowing. A guide wire must be installed to use these functions. You can set a maximum of 3 remote areas.

With the *Lawn Coverage* function the product first follows and then leaves the guide wire after a certain distance and starts to mow the lawn.

The *Systematic Passage Mowing* function is suitable to mow narrow passages of 60 cm - 1.5 m / 23 in. - 4.9 ft. width. The product moves in a pattern to cover the passage width. The product starts the *Systematic Passage Mowing* at the set distance from the charging station. When the product reaches the end of the narrow passage, the product continues and cuts the lawn as normal.

Area A, approximately 50%

Area B, approximately 30%

Area C, approximately 20%

To set the GPS Assisted Navigation

Disable the GPS Assisted Navigation to make manual settings in *Lawn coverage*.

Note: It is recommended to use GPS Assisted Navigation.

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Installation > Lawn coverage*.
3. Push the **OK** button to enable or disable the function.
4. Push the **BACK** button.

To set the Lawn Coverage function

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > Lawn Coverage > Area 1-3*.
3. Use the **arrow** button to select the area.
4. Push the **OK** button.
5. Measure the distance from the charging station to the start of the area. Measure along the guide wire. Refer to *To measure the distance from the charging station on page 26*.
6. Push the **arrow** buttons to select the distance, measured in m.
7. Push the **OK** button.
8. Use the **arrow** buttons to select the percentage of the cutting time the product must cut the area. The percentage is equal to the percentage of the area in relation to the complete work area.
 - a) Measure the area.

- b) Divide the measured area with the total work area.
- c) Convert the result to percentage.

Note: The sum of Area 1-3 must be 100% or less. If the sum is less than 100%, the product sometimes straddles the guide wire and starts to mow at the charging station.

9. Push the **BACK** button.

To set the System Passage Mowing function

Note: To prevent that the grass in the narrow passage is worn, Husqvarna recommends to set a low percentage for the *Systematic Passage Mowing*.

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > Lawn Coverage > Area 1-3*.
3. Use the **arrow** buttons to select the area.
4. Push the **OK** button.
5. Measure the distance from the charging station to the beginning of the narrow passage. Measure along the guide wire. Refer to *To measure the distance from the charging station on page 26*.

Note: Make sure that the distance to the *Systematic Passage Mowing* is set inside the narrow passage.

6. Push the **arrow** buttons to select the distance.
7. Push the **OK** button.
8. Use the **arrow** buttons to select the % of the cutting time that the product must start the narrow passage cutting.
9. Use the **arrow** buttons and the **OK** button to select *More > Systematic Passage Mowing*.
10. Push the **OK** button to enable *Systematic Passage Mowing*.
11. Push the **BACK** button.

To do a test of the Lawn Coverage function

1. Put the product in the charging station.
2. Do step 1-3 in *To get access to the menu on page 22*.
3. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > Lawn Coverage > Area > More > Test*.
4. Push the **OK** button.
5. Push the **START** button.
6. Close the hatch.
7. Make sure the product can find the area.

To measure the distance from the charging station

1. Put the product in the charging station.
2. Do steps 1–3 in *To get access to the menu on page 22*.
3. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > Lawn Coverage > Area > How far?*
4. Use the **arrow** buttons to set 500 m / 500 yd as a distance.
5. Push the **OK** button.
6. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > Lawn Coverage > Area > More > Test*.
7. Push the **OK** button.
8. Push the **STOP** button when the product is at the distance you select to measure. The distance shows in the display.

To disable or enable the Lawn Coverage function

Disable or enable the *Lawn Coverage* function for each area.

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > Lawn Coverage > Area > Disable*.
3. Push the **OK** button.
4. Push the **BACK** button.

To reset the Lawn Coverage settings

You can reset the *Lawn Coverage* settings for each area and use the factory setting.

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > Lawn Coverage > Area > More > Reset*.
3. Push the **OK** button.

3.10.8.2 Methods for the product to find the charging station

The product has 3 search methods to find the charging station :

- Irregular - The product moves in the work area until it finds the signal of the charging station.
- Guide wire - The product moves in the work area until it finds the guide wire. The product moves along the guide wire to the charging station.
- Boundary wire - The product moves in the work area until it finds the boundary wire. The product moves along the boundary wire to the charging station.

The factory setting is set to mix the 3 search methods. When the battery is low the product starts to search for the charging station with the irregular method for 3 min.

After 3 min the product changes search method to the guide wire method. The product tries to find the guide wire for 8 min. After 11 min the product changes search method to the boundary wire method.

You can change the settings for how the product finds the charging station to adapt to the work area.

To set how the product finds the charging station

You can make manual settings to make the product search for the guide wire or the boundary wire in 0–30 min from when the battery is low.

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Installation > To find the charging station > Overview of search methods > Guide*.
3. Push the **arrow buttons** to select 1 of the guide wires.
4. Push the **number buttons** to set the time.
5. Push the **OK** button.
6. Push the **BACK** button.
7. Use the **arrow buttons** and the **OK** button to move through the menu structure *Installation > To find the charging station > Overview of search methods > Boundary wire*.
8. Push the **number buttons** to set the time.
9. Push the **OK** button.
10. Push the **START** button and close the hatch.

To do a test of the guide wire

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Installation > Find charging station > Guide > More > Test guide*.
3. Put the product 3 m / 9 ft. from the boundary wire.
4. Push the **START** button and close the hatch.
5. Make sure the product follows the guide wire to the charging station.
6. Make sure the product docks with the charging station.
7. If the product does not dock with the charging station, change the position of the charging station or the guide wire. Refer to *To install the charging station on page 19* and *To install the guide wire on page 20*.

To do a test of the boundary wire

1. Put the product 3 m / 9 ft. from the boundary wire, facing the boundary wire.
2. Do steps 1–3 in *To get access to the menu on page 22*.
3. Use the **arrow buttons** and the **OK** button to move through the menu structure *Installation > Find*

charging station > Overview of search methods > Boundary > More > Test right / Test left.

4. Push the **START** button and close the hatch.
5. Make sure the product follows the guide wire to the charging station.
6. Make sure the product docks with the charging station.
7. Change the position of the charging station or the guide wire if the product does not dock with the charging station. Refer to *To install the charging station on page 19* and *To install the guide wire on page 20*.

To change the signal range of the charging station

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Installation > Find the charging station > Overview of search methods > Charging station range*.
3. Use the left **arrow button** to select **MAX**, **MID**, **MIN**.
4. Push the **BACK** button.

Note: It is usually better to move the charging station, than to decrease the range of the charging station signal.

3.10.8.3 Corridor width

The area adjacent to the boundary wire is the corridor that the product uses to move to the charging station. The corridor width is a measure of how far from the boundary wire the product can operate when following the boundary wire to and from the charging station.

The corridor width is adjusted automatically. If it is necessary to adjust the corridor width manually for the product to operate satisfactorily, you can set the corridor width between 1–9. The factory setting is 6.

To set the corridor width

1. Do steps 1–3 in *To get access to the menu on page 22*.

2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Installation > Advanced > Corridor width*.
3. Use the **arrow** buttons to select a corridor.
4. Use the **number** buttons to select a corridor width of 1-9.

Note: Make the corridor width as wide as possible for a minimum risk of lines in the lawn.

3.10.8.4 Reversing distance

The reversing distance makes the product move in reverse for a set distance, before the product starts to cut the lawn. The factory setting is 60 cm / 2 ft.

To set the reversing distance

1. Do steps 1-3 in *To get access to the menu on page 22*.
2. Use the **arrow** button and the **OK** button to move through the menu structure *Installation > Advanced > Reversing distance*.
3. Use the **number** buttons to set the distance.
4. Push the **BACK** button.

3.10.8.5 Drive Past Wire function

The front of the product always moves past the boundary wire by a specified distance. Then the product moves rearward and changes direction. The factory setting is 32 cm / 13 in. You can select a distance of 25-50 cm / 10-15 in.

Note: If you change the distance for *Drive Past Wire*, the distance will change along the boundary wire in all parts of the work area.

To set the Drive Past Wire function

1. Do steps 1-3 in *To get access to the menu on page 22*.
2. Use the **arrow** button and the **OK** button to move through the menu structure *Installation > Advanced > Drive Past Wire*.
3. Use the **number** buttons to set the distance.
4. Push the **BACK** button.

3.10.9 Settings

In settings you can change the general settings to your product.

3.10.9.1 ECO mode

If *ECO mode* is activated, it switches off the signal in the boundary loop, the guide wire and the charging station, when the product is parked or is charging.

Note: Use *ECO mode* to save energy and avoid interference with other equipment, for example hearing loops or garage doors.

Note: To start the product manually in the work area, push the **STOP** button before you remove the product from the charging station. If not, the product can not be started in the work area.

To set the ECO mode

1. Do steps 1-3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > ECO mode*.
3. Push the **OK** button to select the *ECO mode*.
4. Push the **BACK** button.

Spiral Cutting

The product cuts the grass in a spiral pattern if the grass is longer in an area. *Spiral cutting* can be set in 5 levels:

- Low-
- Low
- Mid
- High
- High+

The level sets how sensitive the product is to changes in grass height.

Note: *Spiral cutting* is only started in the Main area mode. Cutting in the *Secondary area* mode does not let the product to start *Spiral cutting*. *Spiral Cutting* does not start in slopes steeper than 15%.

To set the Spiral Cutting

1. Do steps 1-3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Settings > Spiral Cutting > Use Spiral Cutting*.
3. Push the **BACK** button.

To set the level of Spiral Cutting

1. Do steps 1-3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Settings > Spiral Cutting > Use Spiral Cutting > Intensity*.

3. Use the left **arrow button** to select the level of the Spiral Cutting.
4. Push the **BACK** button.

3.10.9.2 General

In *General* you can change the general settings of the product.

To set the time & date

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > General > Time & Date*.
3. Use the **number** buttons to set the time and then push the **BACK** button.
4. Use the **number** buttons to set the date and then push the **BACK** button.
5. Use the **arrow** buttons to set the time format and then push the **BACK** button.
6. Use the **arrow** buttons to set the date format and then push the **BACK** button.

To set the language

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > General > Language*.
3. Use the **arrow** buttons to select language and then push the **BACK** button.

To set the Country & Timezone

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > General > Country & Timezone*.
3. Use the **arrow** buttons to select country and then push the **BACK** button.

To set the unit format

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > General > Unit format*.
3. Use the **arrow** buttons to select unit format and then push the **BACK** button.

To reset all user settings

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > General > Reset all user settings*.

3. Use the right **arrow** button to select *Proceed with reset of all user settings?*
4. Push the **OK** button to reset all the user settings.

Note: *Security level, PIN code, Loop signal, Messages, Date & Time, Language and Country settings* are not reset.

Frost Guard

The grass is extra sensitive to wear if the yard is covered with frost. If the *Frost Guard* is activated, the product is not allowed to start to cut the grass if the temperature is below 5° C / 41° F.

Note: The frost guard is located inside the chassis and there can be a delay compared to the ambient temperature.

To set the Frost Guard

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow** buttons and the **OK** button to move through the menu structure *Settings > Installation > Frost Guard*.
3. Push the **OK** button to select *Frost Guard*.
4. Push the **BACK** button.

The About menu

The *About* menu displays information about the product, for example serial number and firmware versions.

3.10.10 Accessories

Settings for accessories mounted on the product can be made in this menu.

3.10.10.1 Information

This menu handles accessories mounted on the product. Contact your local Husqvarna representative for more information on available accessories.

3.10.10.2 Automower® Connect app

The app gives two modes of connectivity: Long-range cellular connectivity and Short-range Bluetooth® connectivity.

The product can connect to mobile devices that have the Automower® Connect app installed. Automower® Connect is a free app for your mobile device. The Automower® Connect app gives extended functions to your Husqvarna product. You can:

- See the status of your product.
- Change settings to your product.

- Get extended product information.
- Get an alarm if the product moves out of the work area.
- See statistics of your product.

Note: All countries do not support cellular connection to Automower® Connect because of regional specified cellular systems. The included Automower® Connect lifetime service only applies if there is a third part subsupplier of 2G/3G/4G available in the operational area.

To install the Automower® Connect app

1. Download the Automower® Connect app on your mobile device.
2. Sign up for a Husqvarna account in the Automower® Connect app.
3. An e-mail is sent to the registered e-mail address. Follow the instructions in the e-mail in less than 24 hours to validate your account.
4. Log in to your Husqvarna account in the Automower® Connect app.

To pair Automower® Connect and the product

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Accessories > Automower® Connect > Pairing > New pairing*.
3. Follow the instructions in the app.

To enable the GeoFence function

GeoFence is a GPS-based theft protection that makes a virtual fence for the product. You will get a message if the product is moved on the other side of the GeoFence.

1. Put the product in the center of the work area.
2. Do steps 1–3 in *To get access to the menu on page 22*.
3. Use the **arrow buttons** and the **OK** button to move through the menu structure *Accessories > Automower Connect > GeoFence > Activate GeoFence*.
4. Push the **OK** button.
5. Select *Activate GeoFence* and push the **OK** button.

To set a new center point for the Geofence function

1. Put the product in the center of the work area.
2. Do steps 1–3 in *To get access to the menu on page 22*.
3. Use the **arrow buttons** and the **OK** button to move through the menu structure *Accessories > Automower Connect > GeoFence > New center point*.
4. Push the **OK** button.

To set the GeoFence level of sensitivity

The higher level of GeoFence sensitivity, the easier the alarm starts.

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Accessories > Automower Connect > GeoFence*.
3. Use the **arrow buttons** to select level of GeoFence sensitivity.
4. Push the **BACK** button.

3.10.10.3 To avoid collisions with the Automower® house

The wear on the product and the Automower® house decreases when you select *Avoid collisions with mower*.

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the arrow buttons and the **OK** button to move through the menu structure *Accessories > Mower house > Avoid collisions with mower*.

Note: If *Avoid collisions with mower* is selected it can result in grass that is not cut around the charging station.

3.10.10.4 Headlights Automower® 405X/415X

To set the schedule for the headlights

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Accessories > Headlights > Schedule*.
3. Select between *Always ON*, *Evening only* (19:00-00:00), *Evening & night* (19:00-07:00) or *Always OFF*.

To set the Flashes when fault function

The headlights flashes if the product stops to operate because of a fault if *Flashes when fault* is enabled.

1. Do steps 1–3 in *To get access to the menu on page 22*.
2. Use the **arrow buttons** and the **OK** button to move through the menu structure *Accessories > Headlights > Flashes when fault*.
3. Use the **OK** button to enable or disable the *Flashes when fault* function.

4 Operation

4.1 To use the ON/OFF button

WARNING: Read the safety instructions carefully before you start the product.

WARNING: Keep your hands and feet away from the rotating blades. Do not put your hands or feet near or below the product when the product is switched on.

WARNING: Do not use the product when persons, especially children, or animals are in the work area.

- Push the **ON/OFF** button for 3 seconds to switch on the product. The product is active when the indicator lamp on the keypad is lit.
- Push the **ON/OFF** button for 3 seconds to switch off the product.
- The product is in power save mode if the indicator lamp flashes. Push the **ON/OFF** button for 3 seconds to switch on the product.

4.2 To start the product

1. Push the **STOP** button to open the hatch.
2. Push the **ON/OFF** button for 3 seconds. The display is lit up.
3. Enter the PIN code.
4. Push the **START** button.
5. Select an operating mode. Refer to *Operating modes - Start on page 31*.
6. Push the **OK** button.
7. Close the hatch.

Note: If the product is parked in the charging station, the product will start to operate when the battery is fully charged and if the *Schedule* settings is set for operation

Note: The first weeks after installation the perceived sound level when cutting the grass may be higher than expected. When the product has cut the grass for some time, the perceived sound level is much lower.

4.2.1 Operating modes - Start

- *Main area*
- *Secondary area*
- *Override schedule*
- *Spot cutting*

4.2.1.1 Main area

Use the operating mode *Main area* for the product to cut and charge automatically.

4.2.1.2 Secondary area

Use *Secondary area* operating mode to cut secondary areas. You must move the product manually between the main area and the secondary area. The product cuts for a selected period of time or until the battery is empty.

Note: You must put the product manually in the charging station to charge the product when it is in a secondary area. The product will move out from the charging station and stop when the battery is charged. You must select an operating mode to start the product.

Note: If you will cut the main area after the battery is charged, set the product to *Main area* mode before you put the product in the charging station.

4.2.1.3 Override schedule

Use the operating mode *Override schedule* to temporarily override the *Schedule* settings for *24h* or *3 days*.

Note: It is not possible to cut more than the maximum cutting time for each day. Refer to *Make an estimate of the necessary operating time on page 22*.

4.2.1.4 Spot cutting

Use the operating mode *Spot cutting* to cut a selected area in a spiral pattern. You must move the product manually to the selected area before you start the *Spot cutting* operating mode.

Note: After the product has operated in the operating mode *Spot cutting*, it will automatically start to cut in the operating mode *Main area* or *Secondary area*.

4.3 To park the product

1. Push the **STOP** button to open the hatch.
2. Push the **ON/OFF** button for 3 seconds. The display is lit up.
3. Enter the PIN code.
4. Push the **PARK** button.
5. Select an operating mode. Refer to *Operating modes - Park on page 32*.
6. Push the **OK** button.
7. Close the hatch.

4.3.1 Operating modes - Park

- *Park until further notice*
- *Start with schedule*

4.3.1.1 Park until further notice

Use the operating mode *Park until further notice* for the product to go back to the charging station. The product will stay in the charging station until you select a new operating mode.

4.3.1.2 Start again with next schedule

Use the operating mode *Start again with next schedule* for the product to go back to the charging station. The product will stay in the charging station until the next *Schedule* setting.

4.4 To stop the product

1. Push the **STOP** button to make the product and the cutting motor stop.

4.5 To switch off the product

1. Push the **STOP** button to open the hatch.
2. Push the **ON/OFF** button for 3 seconds.
3. Do a check that the indicator lamp on the keypad is not lit to make sure that the product is switched off.

4.6 To charge the battery

WARNING: Only charge the product using a charging station which is intended for it. Incorrect use may result in electric shock, overheating or leakage of corrosive liquid from the battery.

In the event of leakage of electrolyte flush with water and seek medical help if it comes in contact with the eyes etc.

When the product is new or has been stored for a long period, the battery can be empty and must be charged before you can start the product. In the *Main area* mode, the product cuts and charges automatically.

1. Push the **ON/OFF** for 3 seconds button to start the product.
2. Put the product in as far as possible in the charging station.
3. Make sure that the charging plates on the charging station connects to the contact plates on the product.
4. Do a check that the display shows the message *CHARGING* to make sure that the product is connected correctly to the charging station.

5 Maintenance

5.1 Introduction - maintenance

WARNING: The product must be switched off before any maintenance is done.

WARNING: Wear protective gloves.

For better operation and longer service life, make sure to clean the product regularly and replace worn parts. All maintenance and servicing must be done according to Husqvarna's instructions. Refer to *Warranty on page 50*.

When the product is first used, the blade disc and blades should be inspected once a week. If the amount of wear during this period has been low, the inspection interval can be increased.

It is important that the blade disc rotates easily. The edges of the blades should not be damaged. The lifetime of the blades varies immensely and depends for instance on:

- Operating time and size of the work area.
- Type of grass and seasonal growth.
- Soil, sand and use of fertilizers.
- The presence of objects such as cones, windfalls, toys, tools, stones, roots and the like.

The normal life is 3 to 6 weeks when used under favorable conditions. Refer to *Replace the blades on page 34* on how to replace the blades.

Note: Working with blunt blades gives a poorer mowing result. The grass is not cut cleanly and more energy is needed resulting in the product not mowing such a large area.

5.2 Clean the product

CAUTION: Never use a high-pressure washer to clean the product. Never use solvents for cleaning.

The product does not operate satisfactorily in slopes if the wheels are blocked with grass. Use a soft brush to clean the product. The product can be cleaned with running water from a water hose.

Husqvarna recommends to use a special cleaning and maintenance kit, available as accessory. Speak to your Husqvarna representative for more information.

5.2.1 To clean the chassis and blade disc

Examine the blade disc and blades weekly. To clean the product fully, the body of the product can be removed. If the product is dirty, use a brush or a water hose to clean the product. Do not use a high-pressure washer to clean the product.

1. Push the **ON/OFF** button to switch off the product. The product is disabled when the indicator lamp is not lit.
2. Carefully pull the top cover at the rear, the front and the middle.

3. Lift up the top cover to remove it.
4. Find the 4 positions where the body is attached.

5. Push the maintenance tool down in 1 of the 4 positions, and pull the body up.
6. Continue with the remaining positions while you hold the body up.

7. Carefully lift the body at the rear and fold it over to remove the body, do not remove the charging cable.

Note: Make sure that the grommets for the charging cable are correctly installed to seal against moisture after you remove the body of the product.

8. Clean the blade disc and chassis with a brush. At the same time, make sure that the blade disc rotates freely. Make sure that the blades are not damaged and can pivot freely.

9. To install the body of the product, put it on the chassis and push into position.
10. To install the top cover, put it on the body of the product and push into position.

Note: Make sure that the grommets for the charging cable are correctly installed to seal against moisture.

5.2.2 Wheels

Clean around the wheels. Grass on the wheels can impact on how the product performs in slopes.

5.2.3 The body of the product

Use a moist, soft sponge or cloth to clean the body of the product. If the body of the product is dirty, use a mild soap solution to clean it.

5.2.4 Charging station

WARNING: Disconnect the power supply from the power outlet before any maintenance, or cleaning of charging station or power supply.

WARNING: Do not use a high-pressure washer or running water to clean the charging station.

Clean the charging station regularly from grass, leaves, twigs and other objects that may impede docking.

5.3 Replace the blades

WARNING: Use blades and screws of the right type. Husqvarna can only guarantee safety when using original blades. Only replacing the blades and reusing the screw can result in a screw wearing during mowing. The blades can then be propelled from under the body and cause serious injury.

Replace worn or damaged parts for safety reasons. Even if the blades are intact, they should be replaced on a regular basis for the best mowing result and low energy usage. All 3 blades and screws must be replaced at the same time to obtain a balanced cutting system. Use Husqvarna original blades embossed with the crowned H-mark logotype, refer to *Technical data on page 47*.

5.3.1 To replace the blades

1. Push the **STOP** button
2. Push the **ON/OFF** button for 3 seconds to switch off the product.

3. Make sure that the indicator lamp on the keypad is out.
4. Turn the product upside down. Put the product on a soft and clean surface to avoid scratching the body and the hatch.
5. Rotate the skid plate so that its holes align with the screws for the blade.
6. Remove the 3 screws with a screwdriver.
7. Remove the 3 blades.
8. Attach 3 new blades and screws.
9. Make sure that the blades can pivot freely.

5.4 Battery

WARNING: Only charge the product using a charging station which is intended for it. Incorrect use may result in electric shock, overheating or leakage of corrosive liquid from the battery. In the event of leakage of electrolyte flush with water and seek medical help if it comes in contact with the eyes etc.

WARNING: Use only original batteries recommended by the manufacturer. Product safety cannot be guaranteed with other batteries. Do not use non-rechargeable batteries.

CAUTION: The battery must charge a complete cycle before winter storage. If the battery is not fully charged it can be damaged and in certain cases be rendered useless.

If the operating time for the product is shorter than normal between charges, this indicates that the battery is getting old and eventually needs replacing.

Note: Battery life is dependent on the length of the season and how many hours a day the product is

operating. A long season or many hours of use a day means that the battery must be replaced more regularly. The battery is fine as long as the product maintains a well-cut lawn.

5.5 Winter service

Take your product to your Husqvarna central service for service prior to winter storage. Regular winter service will maintain the product in good condition and create the best conditions for a new season without any disruptions.

Service usually includes the following:

- Thorough cleaning of the body, the chassis, the blade disc and all other moving parts.
- Testing of the product's function and components.
- Checking and, if required, replacing wear items such as blades and bearings.
- Testing the product's battery capacity as well as a recommendation to replace battery if necessary.
- If new firmware is available, the product is updated.

6 Troubleshooting

6.1 Introduction - troubleshooting

In this chapter you can find information and help about faults and symptoms of the product. You can find more information and FAQ (Frequently Asked Questions) on www.husqvarna.com.

6.2 Fault messages

The fault messages in the table below are shown in the display of the product. Speak to your Husqvarna representative if the same message shows frequently.

Message	Cause	Action
<i>No loop signal</i>	The power supply or low-voltage cable is not connected.	If the LED status indicator on the charging station is not lit, it shows that there is no power. Examine the wall socket connection and the residual-current device. Make sure that the low-voltage cable is connected to the charging station.
	The power supply or low-voltage cable is damaged or not connected.	Replace the power supply or low-voltage cable.
	The boundary wire is not connected to the charging station.	Check that the boundary wire connectors are fitted properly to the charging station. Replace connectors if damaged. Refer to <i>To install the boundary wire on page 20</i> .
	The boundary wire is broken.	Do a check of the LED status indicator on the charging station. If it shows break in the boundary wire, replace the damaged section with a new loop wire and splice using an original coupler.
	<i>ECO mode</i> is activated and the product has attempted to start outside the charging station.	Put the product in the charging station, start the product and close the hatch.
	The boundary wire is crossed on its way to and from an island.	Check that the boundary wire is laid according to instructions, e.g. in the right direction around the island. Refer to <i>To install the boundary wire on page 20</i> .
	The pairing between the product and the charging station is lost.	Put the product in the charging station and generate a new loop signal. Refer to <i>To create a New loop signal on page 24</i> .
	Disturbances from metal objects (fences, reinforcement steel) or buried cables close by.	Try to move the boundary wire and/or make islands in the work area to increase the signal strength.
<i>Connection NOT changed</i>	Failed to change loop signal.	Try to create a <i>New loop signal</i> several times. Refer to <i>To create a New loop signal on page 24</i> . If the problem stays speak to your authorized service technician.

Message	Cause	Action
<i>Wheel motor blocked, left/right</i>	Grass or other object is wrapped around the drive wheel.	Clean the wheels and around the wheels.
<i>Wheel motor overloaded, left/right</i>		
<i>Wheel drive problem, right/left</i>		
<i>Cutting system blocked</i>	Grass or other object is wrapped around the drive wheel.	Clean the wheels and around the wheels.
	The blade disc lies in a pool of water.	Move the product and prevent the collection of water in the work area.
	The grass is too high.	Cut the grass before you install the product. Make sure that the grass is maximum 10 cm / 3.9 in.
<i>Cutting system imbalance</i>	Too few or too many blades.	Do a check of the blades on the blade disc.
<i>Outside working area</i>	The boundary wire connections to the charging station are crossed.	Check that the boundary wire is connected correctly.
	The boundary wire is too close to the edge of the work area.	Check that the boundary wire has been laid according to the instructions. Refer to <i>To install the boundary wire on page 20</i> .
	The work area slopes too much by the boundary loop.	
	The boundary wire is laid in the wrong direction around an island.	
	Disturbances from metal objects (fences, reinforcement steel) or buried cables close by.	Try moving the boundary wire.
	The product finds it hard to distinguish the signal from another product installation close by.	Put the product in the charging station and generate a new loop signal.
<i>Slope too steep</i>	The product stopped because the slope is too steep.	Change the installation of the boundary wire to not include this steep part of the work area. Refer to <i>To put the boundary wire in a slope on page 16</i> .
<i>Empty battery</i>	The product cannot find the charging station.	Change the position of the guide wire. Refer to <i>To install the guide wire on page 20</i> .
	The battery is at the end of its life cycle.	Replace the battery. Refer to <i>Battery on page 35</i> .
	The charging station's antenna is defective.	Check if the indicator lamp in the charging station flashes red. Refer to <i>Indicator lamp in the charging station on page 41</i> .
	The charging plates on the product or contact plates on the charging station are corroded.	Clean the charging and contact plates using a fine grade emery cloth. If the problem stays speak to your authorized service technician.

Message	Cause	Action
<i>Battery problem</i>	Temporary battery or firmware related issue in the product.	Restart the product. If the problem stays speak to your authorized service technician.
	Incorrect type of battery.	Use original batteries recommended by the manufacturer.
<i>Battery temperature outside limits</i>	The temperature in the battery is too high or too low to start operation.	No action. The product will start to operate when the temperature is in limits.
<i>Wrong PIN code</i>	Wrong PIN code has been entered. Five attempts are permitted, and the keypad is then blocked for a period of time.	Enter the correct PIN code. Contact Husqvarna customer service if you forget the PIN code.
<i>No drive</i>	The product has got caught in something and has been slipping.	Free the product and rectify the reason for the lack of drive. If it is due to wet grass, wait until the lawn has dried before using the product.
	The work area includes a steep slope.	Steep slopes should be isolated. Refer to <i>To put the boundary wire in a slope on page 16</i> .
	The guide wire is not laid diagonally in the slope.	Make sure that the guide wire is installed diagonally across the slope. Refer to <i>To make a secondary area on page 18</i> .
<i>Collision sensor problem, front/rear</i>	The product body can not move freely around its chassis.	Check that the product body can move freely around its chassis. If the problem stays speak to your authorized service technician.
<i>Alarm! Mower switched off</i>	The alarm is activated because the product had been switched off.	Adjust the security level in the <i>Security</i> menu. Refer to <i>Security level on page 23</i> .
<i>Alarm! Mower stopped</i>	The alarm is activated because the product has been stopped.	
<i>Alarm! Mower lifted</i>	The alarm is activated because the product has been lifted.	
<i>Alarm! Mower tilted</i>	The alarm is activated because the product has been tilted.	
<i>Alarm! Mower was moved</i>	The alarm is activated because the product has been lifted.	
<i>Alarm! Outside geo-fence</i>	The alarm was activated because the product was outside its <i>GeoFence</i> .	
<i>Charging station blocked</i>	The contact between the charging plates on the product on the and contact plates on the charging station may be poor and the product has made a number of attempts to charge.	Put the product in the charging station and check that the charging plates and contact plates make good contact.
	An object is in the way of the product that prevents it to enter the charging station.	Remove the object.
	The charging station is tilted or bent.	Put the baseplate on level ground.
	The guide wire is not installed correctly.	Check if the guide wire is installed according to the instructions. Refer to <i>To install the guide wire on page 20</i> .

Message	Cause	Action
<i>Stuck in charging station</i>	There is an object in the way of the product preventing it from leaving the charging station.	Remove the object.
<i>Charging system problem</i>	Incorrect type of battery.	Use original batteries recommended by the manufacturer.
<i>Charging current too high</i>	Incorrect or defective power supply unit.	Restart the product. If the problem stays speak to your authorized service technician.
<i>No power in charging station</i>	Incorrect or defective power supply unit.	Examine the power supply. If it is necessary, replace the power supply.
	Power failure.	Find and correct the cause of the power failure.
	No contact between the contact plates and the charging plates.	Make sure that the charging plates and the contact plates are connected.
<i>Trapped</i>	The product is stuck in a small area behind a number of obstacles.	Remove the obstacles or create an island around the obstacles. Refer to <i>To make an island on page 17</i> .
<i>Mower tilted</i>	The product is tilted more than the maximum angle.	Move the product to a flat area.
<i>Upside down</i>	The product is leaning too much or has turned over.	Turn the product the right way up.
<i>Lifted</i>	The lift sensor has been activated as the product has been lifted.	Check that the product body can move freely around its chassis. Remove or create an island around objects that can cause the chassis to be lifted. If the problem stays speak to your authorized service technician.
<i>Electronic problem</i>	Temporary electronic or firmware related issue in the product.	Restart the product. If the problem stays speak to your authorized service technician.
<i>Loop sensor problem, front/rear</i>		
<i>Tilt sensor problem</i>		
<i>Temporary problem</i>		
<i>Invalid sub-device combination</i>		
<i>Temporary battery problem</i>		
<i>Safety function faulty</i>		
<i>Invalid system combination</i>		

6.3 Information and warning messages

The information messages in the table below are shown in the display of the product. Speak to your Husqvarna representative if the same message shows frequently.

Message	Cause	Action
<i>Limited cutting height</i>	The cutting height adjustment cannot move.	Examine the cutting height adjustment and remove grass or other objects. If the problem stays, speak to your approved servicing dealer.
<i>Unexpected cutting height adj</i>		
<i>Limited cutting height range</i>		
<i>Cutting height problem</i>		
<i>Cutting height blocked</i>		
<i>GPS navigation problem</i>	Problem with the GPS assisted navigation equipment.	Speak to your local Husqvarna representative if this message appears often.
<i>Weak GPS signal</i>	The sky is blocked in large parts of the work area.	Remove objects that can cause a blockage of the GPS signal.
		Disable the GPS navigation function and use the <i>Lawn coverage</i> function. Refer to <i>GPS Assisted Navigation, Lawn Coverage and Systematic Passage Mowing on page 25</i> .
<i>Low battery</i>	The product cannot find the charging station.	Change the position of the guide wire. Refer to <i>To install the guide wire on page 20</i> .
	The battery is at the end of its life cycle.	Replace the battery. Refer to <i>Battery on page 35</i> .
	The antenna of the charging station is defective.	Do a check if the indicator lamp in the charging station flashes red. Refer to <i>Indicator lamp in the charging station on page 41</i> .
	The charging plates on the product or contact plates on the charging station are defective because of corrosion.	Clean the charging and contact plates using a fine grade emery cloth. If the problem stays speak to your approved servicing dealer.
<i>Settings restored</i>	A <i>Reset all user settings</i> has been done.	Usual operation of the product.
<i>Guide not found</i>	The guide wire is not connected to the charging station.	Connect the guide wire to the charging station. Refer to <i>To install the guide wire on page 20</i> .
	Damage in the guide wire.	Replace the damaged section with new guide wire.
	The guide wire is not connected to the boundary loop.	Connect the guide wire correctly to the boundary loop. Refer to <i>To install the boundary wire on page 20</i> .
<i>Connection changed</i>	New loop signal changed.	Usual operation of the product.

Message	Cause	Action
<i>Difficult finding home</i>	The product has been following the boundary wire several laps without finding the charging station.	The installation has not been done correctly. Refer to <i>To install the boundary wire on page 20</i> .
		Wrong corridor width setting on boundary wire. Refer to <i>To install the boundary wire on page 20</i> .
		The product was started on a Secondary area with the Main area setting.
<i>Needs manual charging</i>	The product is set to the <i>Secondary area</i> operating mode.	Put the product in the charging station.
<i>Next start hh:mm</i>	The schedule setting prevents the product from operating.	Change the schedule settings. Refer to <i>Schedule on page 22</i> .
	The rest period is in progress. The product has an inbuilt standby period according to the Standby time table.	This behavior is normal and no action is required.
	The clock or date in the product is not correct.	Set the time. Refer to <i>To set the time & date on page 29</i> .
<i>Today's mowing completed</i>	The product has an inbuilt standby period according to the Standby time table.	This behavior is normal and no action is required. Refer to <i>To get access to the menu on page 22</i> .
<i>Connectivity problem</i>	Potential problem on the connectivity circuit board in the product.	Restart the product. If the problem stays speak to your authorized service technician.

6.4 Indicator lamp in the charging station

The indicator lamp in the charging station must show a solid or flashing green light for a correct installation. If not, follow the instructions in the troubleshooting guide below.

Speak to your Husqvarna customer service for more information.

Light	Cause	Action
Green solid light	Good signals	Usual operation of the product.
Green flashing light	The signals are good and <i>ECO mode</i> is enabled.	Usual operation of the product. Refer to <i>ECO mode on page 28</i> .
Blue flashing light	The boundary wire is not connected to the charging station.	Make sure that the boundary wire is correctly installed in the charging station. Refer to <i>To install the boundary wire on page 20</i> .
	Damage in the boundary wire.	Find out where the damage is. Replace the damaged section with new boundary wire.
Red flashing light	Interference in the antenna of the charging station.	Speak to your Husqvarna customer service.
Red solid light	Error in the circuit board or incorrect power supply in the charging station. The error must be corrected by an authorized service technician.	Speak to your Husqvarna customer service.

6.5 Symptoms

If the product does not operate as usual, follow the symptoms table below. Speak to your Husqvarna customer service if you cannot find the cause for the fault.

Symptoms	Cause	Action
The product has difficulty docking.	The guide wire is not put straight in a line and correct distance from the charging station.	Do a check of the installation of the charging station. Refer to <i>To install the charging station on page 19</i>
	The guide wire is not put in the slot in the charging station plate.	Make sure that the guide wire is put straight in a line and put in the slot in the charging station plate. Refer to <i>To install the guide wire on page 20</i> .
	The charging station is not on a level surface.	Put the charging station on a level surface. Refer to <i>To examine where to put the charging station on page 14</i> .
The product operates at the wrong time	The time or the date in the product is not correct.	Set the time or date. Refer to <i>To set the time & date on page 29</i> .
	The start and stop times for operating are incorrect.	Change the <i>Schedule</i> settings. Refer to <i>Schedule on page 22</i> .
The product vibrates.	The cutting system is not in balance because of damaged blades.	Examine the blades and screws and replace them if necessary. Refer to <i>Replace the blades on page 34</i> .
	The cutting system is not in balance because of too many blades in the same position.	Do a check that only one blade is attached at each screw.
	Different thickness of blades are installed on the product.	Do a check if the blades are of different thickness and replace if necessary.
The product operates, but the blade disc does not rotate.	The product searches for the charging station, or is moving to the starting point.	Usual operation for the product. The blade disc does not rotate when the product is searching for the charging station.
The product operates for shorter periods than usual between charges.	Grass or other object causes a blockage to the blade disc.	Remove and clean the blade disc. Refer to <i>To clean the chassis and blade disc on page 33</i> .
	The battery is at the end of its life cycle.	Replace the battery. Refer to <i>Battery on page 35</i> .
	Blunt blades. More energy is necessary when cutting the grass.	Replace the blades. Refer to <i>Replace the blades on page 34</i> .
Mowing and charging times are shorter than usual.	The battery is at the end of its life cycle.	Replace the battery. Refer to <i>Battery on page 35</i> .

Symptoms	Cause	Action
The product is parked for hours in the charging station.	The product has operated the maximum cutting time for the day.	No action. Refer to <i>Schedule on page 22</i> .
	The hatch is closed but the START button is not pushed.	Push the STOP button to open the hatch. Enter the PIN code and confirm with the OK button. Push the START button and then close the hatch.
	Parking mode is enabled.	Change the operating mode. Refer to <i>Operating modes - Start on page 31</i> .
	The product does not operate if the battery temperature is too high or too low.	Make sure that the charging station is put in an area with protection from the sun.
Uneven mowing results.	The product operates for a small number of hours per day.	Increase the cutting time. Refer to <i>Schedule on page 22</i> .
	For the shape of the work area it is necessary to adjust the settings for <i>Lawn Coverage</i> to cover all parts of the work area.	Change the settings of the areas where the product starts to cut and how often. Refer to <i>GPS Assisted Navigation, Lawn Coverage and Systematic Passage Mowing on page 25</i> .
	The work area is too large.	Decrease the size of the work area or extend the schedule. Refer to <i>Schedule on page 22</i> .
	Blunt blades.	Replace all the blades. Refer to <i>Replace the blades on page 34</i> .
	Long grass in relation to the set cutting height.	Increase the cutting height and then lower it when the grass is shorter.
	Collection of grass by the blade disc or around the motor shaft.	Remove the collection of grass and clean the product. Refer to <i>Clean the product on page 33</i> .

6.6 Find breaks in the loop wire

Breaks in the loop wire are usually the result of unintentional physical damage to the wire such as when gardening with a shovel. In countries with ground frost, also sharp stones that move in the ground can damage the wire. Breaks can also occur due to the wire being stretched excessively during installation.

Mowing the grass too low right after the installation can damage wire insulation. Damage to the insulation may not cause disruptions until several weeks or months later. To avoid this, always select the maximum cutting height the first weeks after installation and then lower the height one step at a time every second week until the desired cutting height has been reached.

A defective splicing of the loop wire can also lead to disruptions several weeks after the splice was done. A faulty splice can, for example, be the result of the coupler not being pressed together hard enough with a pair of pliers, or that a coupler of lower quality than the original coupler has been used. Please first check all known splices before further troubleshooting is done.

A wire break can be located by gradually halving the distance of the loop where the break may have occurred until there is only a very short section of the wire left.

The following method does not work if *ECO mode* is activated. Make sure first that *ECO mode* is switched off. Refer to *ECO mode on page 28*.

1. Check that the indicator lamp in the charging station flashes blue, which indicates a break in the boundary loop. Refer to *Indicator lamp in the charging station on page 41*.

2. Check that the boundary wire connections to the charging station are properly connected and not damaged. Check that the indicator lamp in the charging station is still flashing blue.
3. Switch the connections between the guide wire and the boundary wire in the charging station.

Start by switching connection AL and GUIDE.

If the indicator lamp has a solid green light, then the break is somewhere on the boundary wire between AL and the point where the guide wire is connected to the boundary wire (thick black line in the illustration).

To rectify the fault you will need boundary wire, connector(s) and coupler(s):

- a) If the suspected boundary wire is short then it is easiest to exchange all of the boundary wire between AL and the point where the guide wire is connected to the boundary wire (thick black line).
- b) If the suspected boundary wire is long (thick black line) then do as follows: Put AL and GUIDE back to their original positions. Then disconnect AR. Connect a new loop wire to AR. Connect the other end of this new loop wire at the middle of the suspected wire section.

If the indicator lamp now is green, then the break is somewhere in the wire between the disconnected end to the point where the new wire is connected (thick black line below). In that case, move the connection for the new wire closer to the disconnected end (roughly at the middle of the suspected wire section) and check again if the indicator lamp is green.

Continue until only a very short section of the wire remains which is the difference between a solid green light and a flashing blue light. Then follow instruction in step 5 below.

4. If indicator lamp still flashes blue in step 3 above: Put AL and GUIDE back in their original positions. Then switch AR and GUIDE. If indicator lamp now is lit with a solid green light then disconnect AL and connect a new boundary wire to AL. Connect the other end of this new wire at the middle of the suspected wire section. Follow the same approach as in 3a) and 3b) above.
5. When the break is found, the damaged section must be replaced with a new wire. Always use original couplers.

7 Transportation, storage and disposal

7.1 Transportation

The supplied Li-ion batteries obey the Dangerous Goods Legislation requirements.

- Obey all applicable national regulations.
- Obey the special requirement on package and labels for commercial transportations, including by third parties and forwarding agents.

7.2 Storage

- Fully charge the product. Refer to *To charge the battery on page 32*.
- Switch off the product. Refer to *To switch off the product on page 32*.
- Clean the product. Refer to *Clean the product on page 33*.
- Keep the product in a dry, frost free space.
- Keep the product with all wheels on level ground during storage, or use a wall hanger.
- If you keep the charging station indoors, disconnect and remove the power supply and all the connectors from the charging station. Put the end of each connector wire in a connector protection box.

Note: If you keep the charging station outdoors, do not disconnect the power supply and the connectors.

- Contact Husqvarna sales representative about what accessories are available for your product.

7.3 Disposal

- Obey the local recycling requirements and applicable regulations.
- For questions about how to remove the battery, refer to *To remove the battery on page 46*.

7.3.1 To remove the battery

CAUTION: Only remove the battery when you dispose the product. When you remove the warranty seal, the Husqvarna warranty is no longer applicable.

1. Remove the top cover and the body of the product. Follow steps 1-7 in *To clean the chassis and blade disc on page 33*.
2. Remove the 12 screws with a Torx 20.

3. Lift the rear edge of the top section of the chassis.
4. Disconnect the cable from the main circuit board.
5. Remove the top section of the chassis.
6. Remove the 2 screws that holds the battery with a Torx 20.

7. Push to detach the clips and lift up the battery holder.

8. Disconnect the battery cable from the main circuit board.

8 Technical data

8.1 Automower® 405X/415X

Dimensions	Automower® 405X	Automower® 415X
Length, cm / in	61 / 24.0	61 / 24.0
Width, cm / in	45 / 17.7	45 / 17.7
Height, cm / in	24 / 9.4	24 / 9.4
Weight, kg / lbs	9.7 / 21.4	9.7 / 21.4
Electrical system	Automower® 405X	Automower® 415X
Battery, Lithium-Ion 18 V/2.0 Ah Art. No.	5937420-01, 5937420-03, 5937420-04, 5937420-06	
Battery, Lithium-Ion 18.25 V/2.0 Ah Art. No.	5937420-02, 5937420-05	
Power supply (28V DC), V AC	100-240	100-240
Low-voltage cable length, m / ft	10 / 33	10 / 33
Mean energy consumption at maximum use	5 kWh/ month for a work area of 600 m ² / 0.15 acre	10 kWh/month for a work area of 1500 m ² / 0.37 acre
Charging current, A DC	1.3	1.3
Type of Power Supply Unit ⁷	ADP-40BR XX, ADP 28EW XX, FW7313/28/D/XX/Y/1.3/PI, FW7313/28/D/XX/Y/1.3	
Average mowing time, min	50	50
Average charging time, min	60	60
Boundary wire antenna	Automower® 405X	Automower® 415X
Operating Frequency Band, Hz	100-80000	100-80000
Maximum magnetic field ⁸ , dBuA/m	82	82
Maximum Radio-frequency power ⁹ , mW @60m	<25	<25
Sound data ¹⁰	Automower® 405X	Automower® 415X
Measured sound power noise level, dB (A)	61	61
Noise emissions uncertainties K _{WA} , dB (A)	2	2
Sound pressure noise level at the operator's ear ¹¹ , dB (A)	53	53

⁷ XX, YY can be any alphanumeric characters or blank for marketing purpose only, no technical differences.

⁸ Measured according to EN 303 447.

⁹ Maximum active output power to antennas in the frequency band in which the radio equipment operates.

¹⁰ Determined according to Directive 2006/42/EC and standard EN 50636-2-107.

¹¹ Sound pressure noise uncertainties K_{pA}, 2-4 dB (A)

Mowing	Automower® 405X	Automower® 415X
Cutting system	3 pivoted cutting blades	3 pivoted cutting blades
Cutting motor speed, rpm	2300	2300
Power consumption during cutting, W +/- 20 %	20	20

9 Warranty

9.1 Warranty terms

Husqvarna® warranty covers this product's functionality for a period of 2 years from date of purchase. The warranty covers serious faults relating to materials or manufacturing faults. Within the warranty period, we will replace the product or repair it at no charge if the following terms are met:

- The product and the charging station may only be used in compliance with the instructions in this Operator's Manual. This manufacturer's warranty does not affect warranty entitlements against the dealer/retailer.
- End-users or non-authorized third parties must not attempt to repair the product.

Examples of faults which are not included in the warranty:

- Damage caused by water seepage from using a high-pressure washer, or from being submerged under water, for example when heavy rain forms pools of water.
- Damage caused by lightning.
- Damage caused by improper battery storage or battery handling.
- Damage caused by using a battery that is not a Husqvarna original battery.
- Damage caused by not using Husqvarna original spare parts and accessories, such as blades and installation material.
- Damage to the loop wire.
- Damage caused by non-authorized changing or tampering with the product or its power supply.

The blades and wheels are seen as disposable and are not covered by the warranty.

If an error occurs with your Husqvarna product, please contact Husqvarna customer service for further instructions. Please have the receipt and the product's serial number at hand when contacting Husqvarna customer service.
